

Configuring Windows File System Permissions (3e)

Access Control and Identity Management, Third Edition - Lab 05

Student:

Christopher Phan

Email:

cphan@udallas.edu

Time on Task:

5 hours, 42 minutes

Progress:

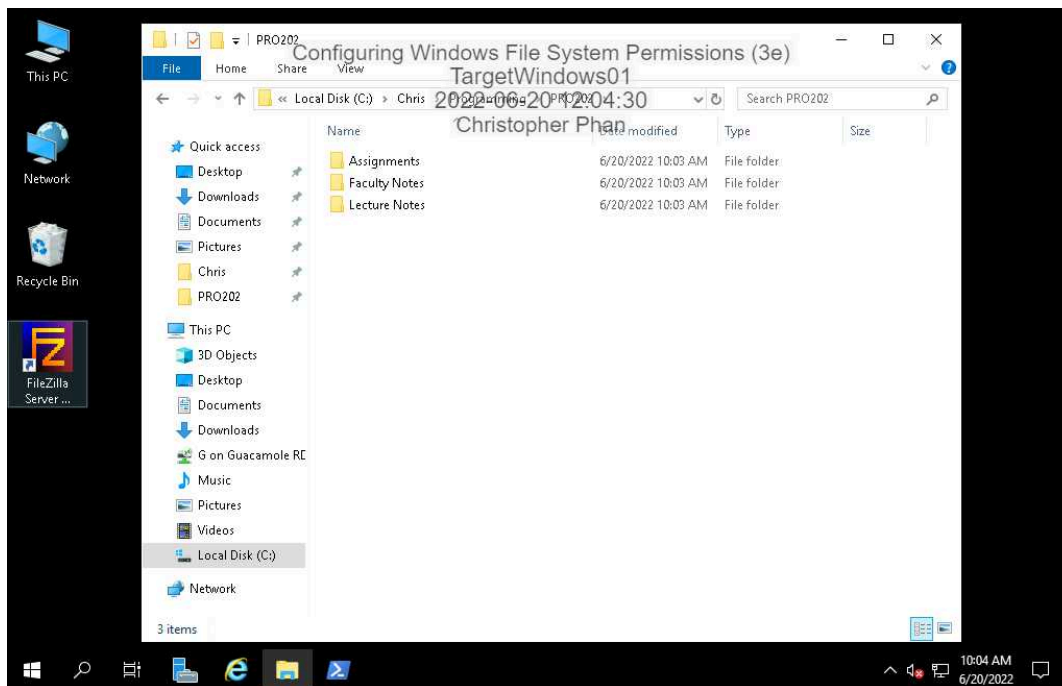

69%

Report Generated: Monday, June 20, 2022 at 2:08 PM

Section 1: Hands-On Demonstration

Part 1: Create the Folder Structure

9. Make a screen capture showing the **folder structure and file path** including the folder you created in your own name.

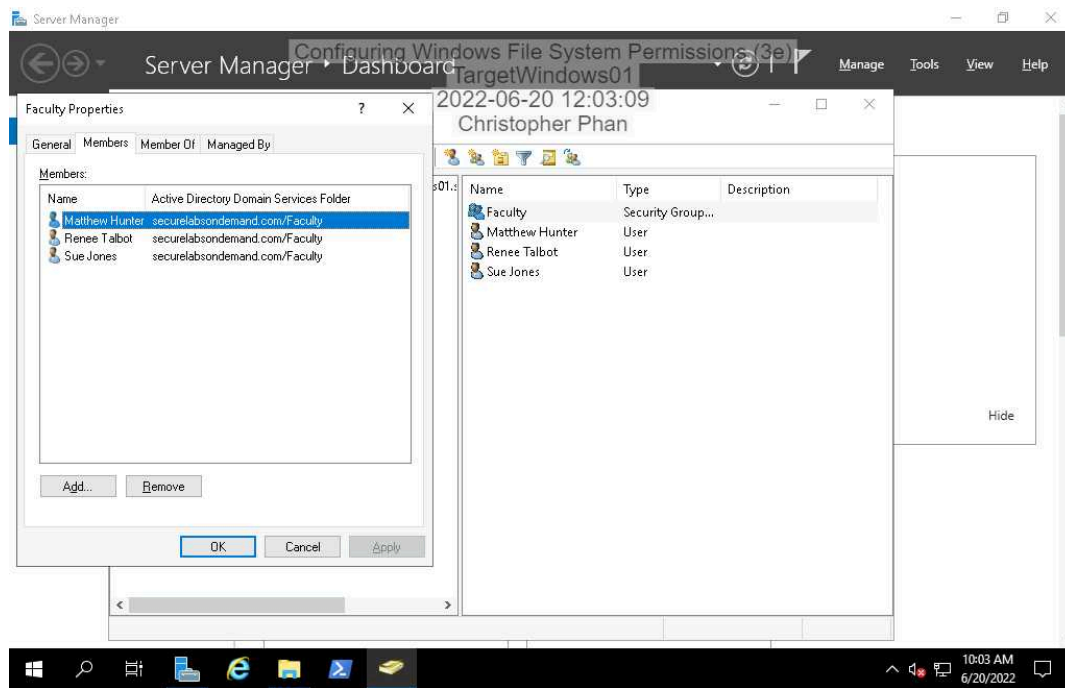

Part 2: Create Security Groups

Configuring Windows File System Permissions (3e)

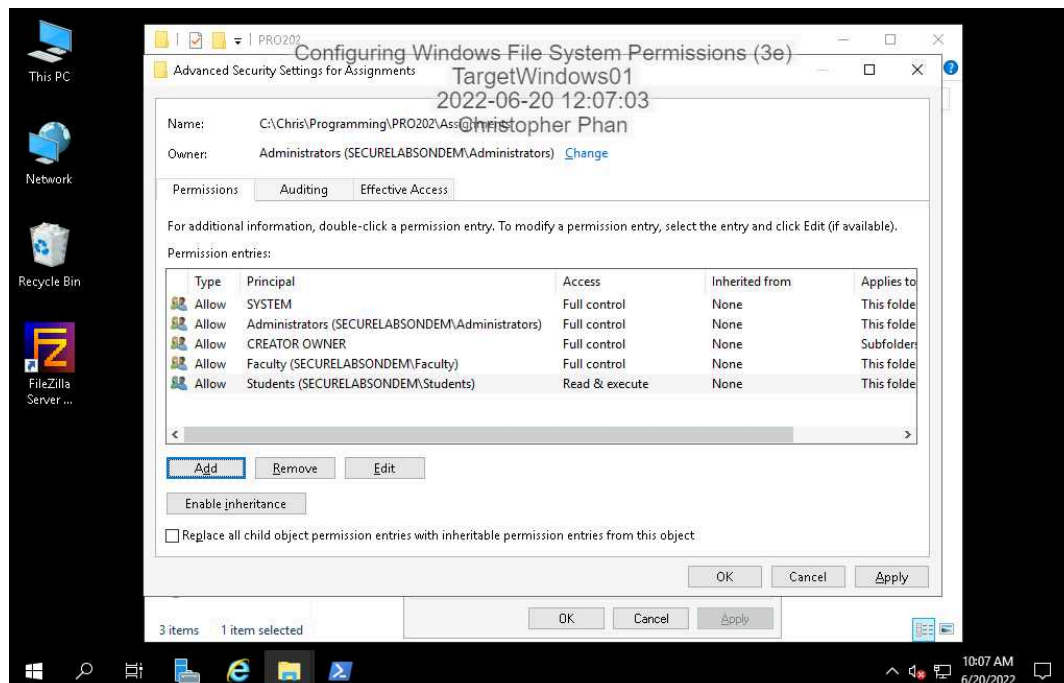

Access Control and Identity Management, Third Edition - Lab 05

14. Make a screen capture showing the **populated Members tab** of the **Faculty Properties** dialog box.

Part 3: Set Group Permissions on Folders

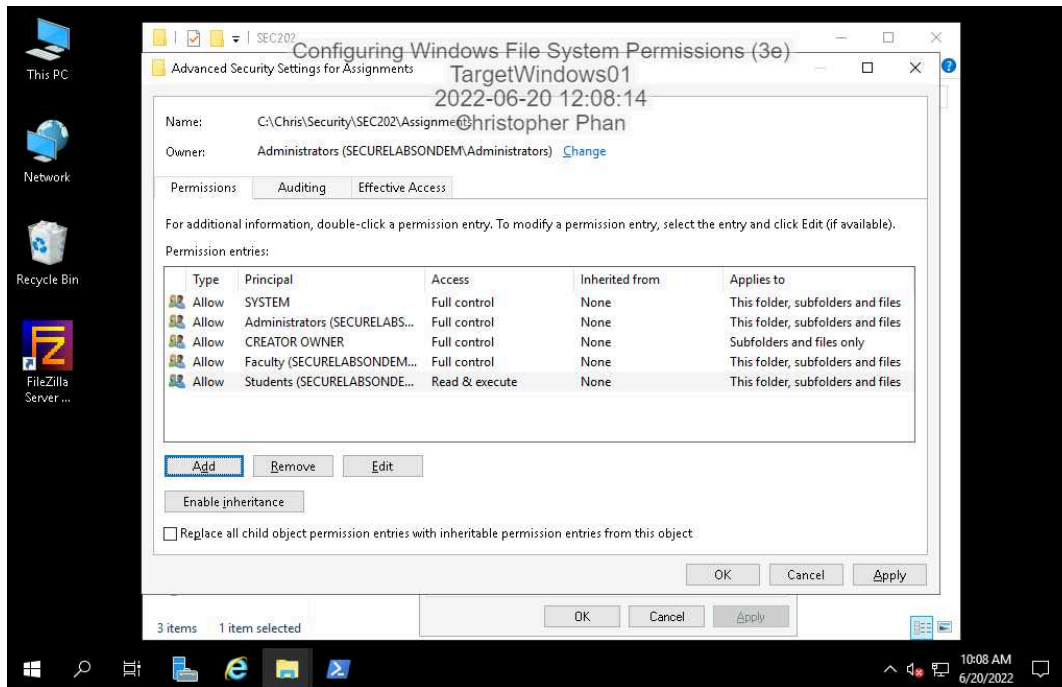

16. Make a screen capture showing the **new permissions** in the **Advanced Security Settings for Assignments** dialog box.

Configuring Windows File System Permissions (3e)

Access Control and Identity Management, Third Edition - Lab 05

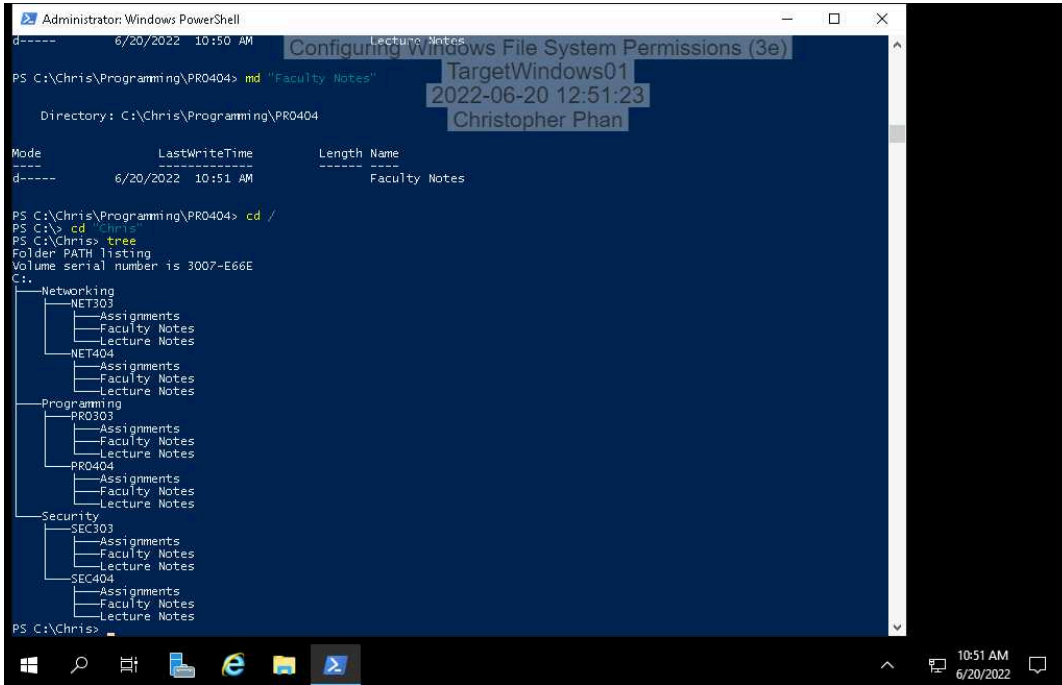

22. Make a screen capture showing the new permissions in the Advanced Security Settings for Assignment dialog box for the SEC202 Assignments folder.

Section 2: Applied Learning

Part 1: Create the Folder Structure

8. Make a screen capture showing the **tree list** for the **C:\yourname** directory.

```
Administrator: Windows PowerShell
d----- 6/20/2022 10:50 AM
PS C:\Chris\Programming\PR0404> md "Faculty Notes"
Directory: C:\Chris\Programming\PR0404

Mode                LastWriteTime         Length Name
----                -
d----- 6/20/2022 10:51 AM             Faculty Notes

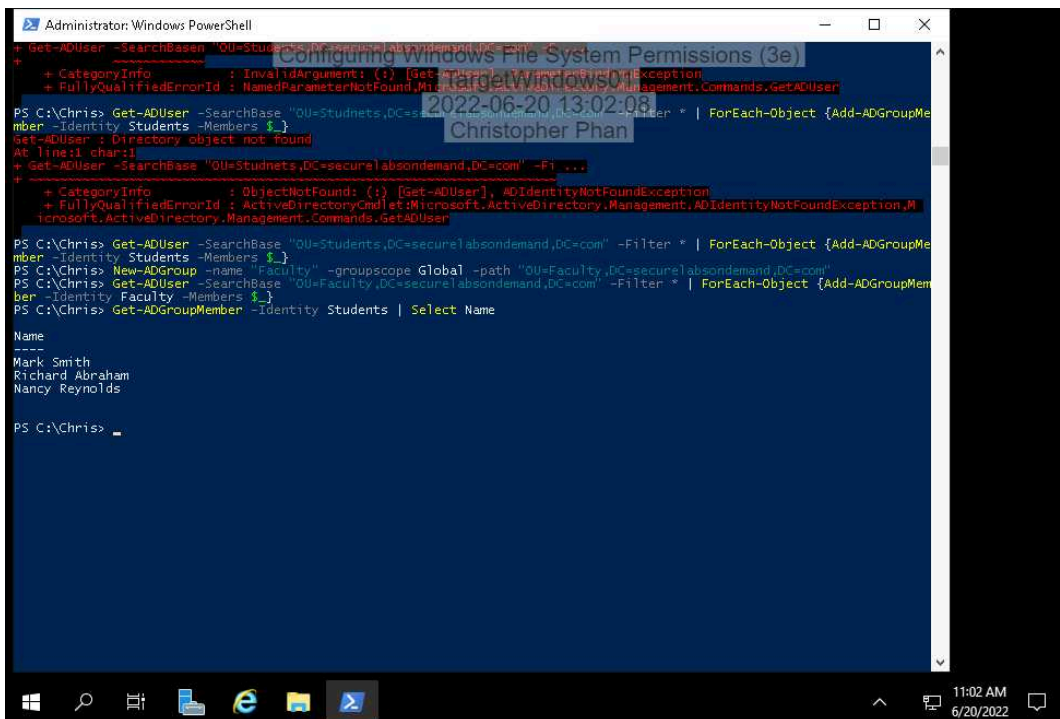

PS C:\Chris\Programming\PR0404> cd /
PS C:\> cd Chris
PS C:\Chris> tree

Part 2: Create Security Groups

Configuring Windows File System Permissions (3e)

Access Control and Identity Management, Third Edition - Lab 05

5. Make a screen capture showing the members of the Students Security group.

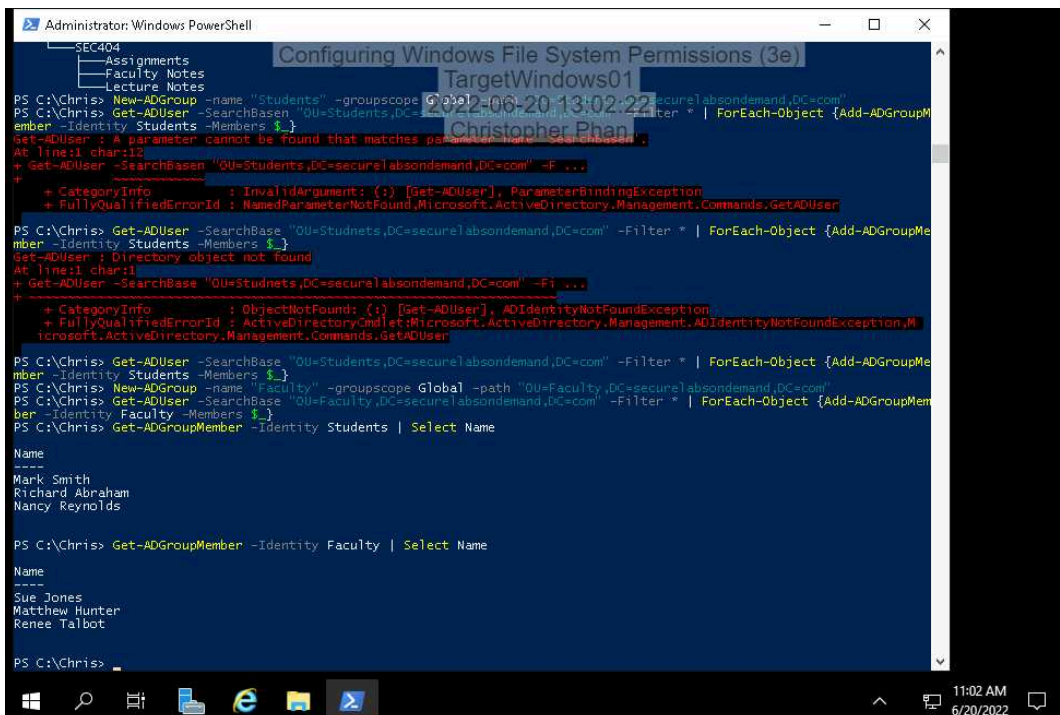

The screenshot shows a Windows PowerShell window titled "Administrator: Windows PowerShell". The command prompt is at PS C:\Chris>. The user has entered the command: `Get-ADGroupMember -Identity Students`. The output shows the members of the Students group: Mark Smith, Richard Abraham, and Nancy Reynolds. The command prompt is now at PS C:\Chris>.

```
PS C:\Chris> Get-ADGroupMember -Identity Students
Name
----
Mark Smith
Richard Abraham
Nancy Reynolds

PS C:\Chris>
```

7. Make a screen capture showing the members of the Faculty Security group.

The screenshot shows a Windows PowerShell window titled "Administrator: Windows PowerShell". The command prompt is at PS C:\Chris>. The user has entered the command: `Get-ADGroupMember -Identity Faculty`. The output shows the members of the Faculty group: Sue Jones, Matthew Hunter, and Renee Talbot. The command prompt is now at PS C:\Chris>.

```
PS C:\Chris> Get-ADGroupMember -Identity Faculty
Name
----
Sue Jones
Matthew Hunter
Renee Talbot

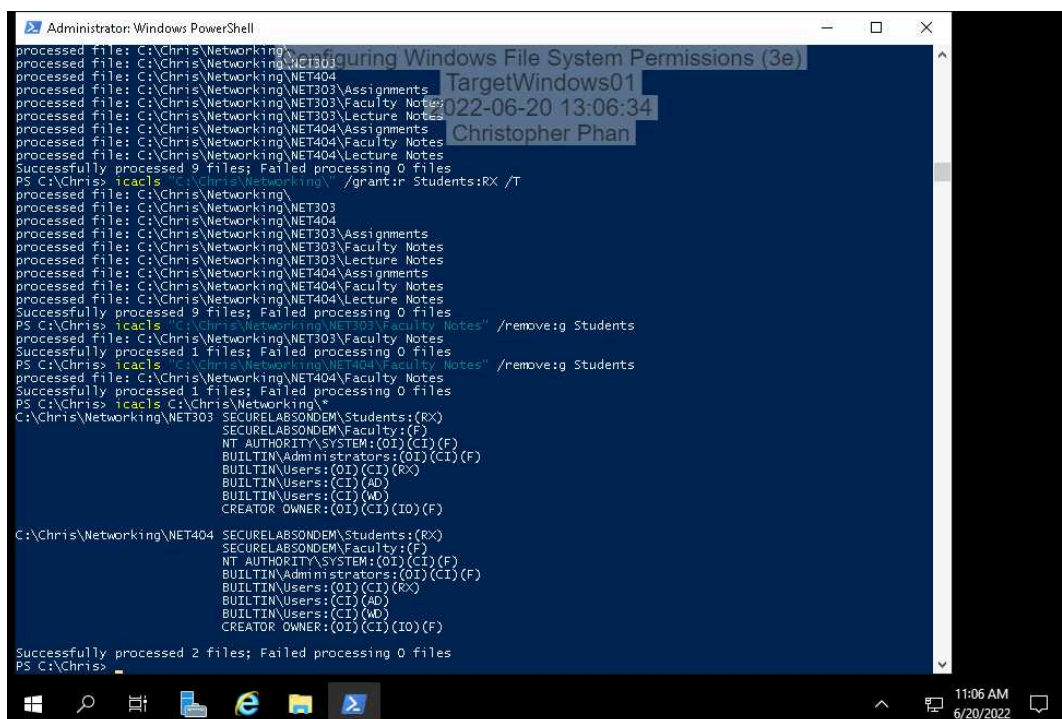

PS C:\Chris>
```

Part 3: Set Group Permissions on Folders

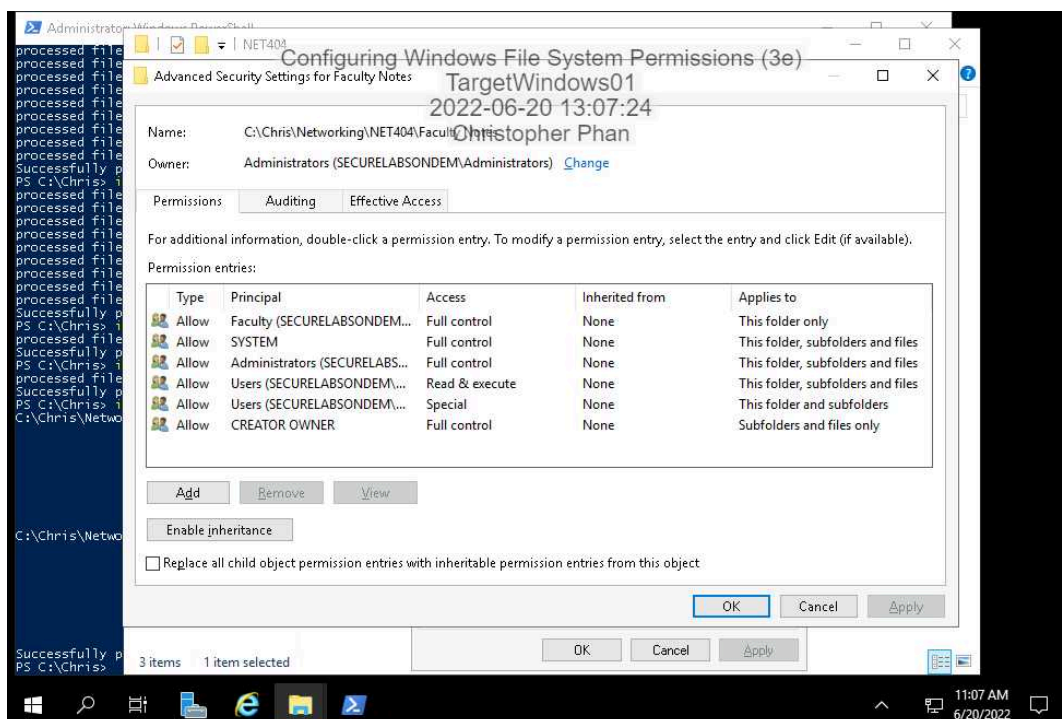

Configuring Windows File System Permissions (3e)

Access Control and Identity Management, Third Edition - Lab 05

7. Make a screen capture showing the permissions for the folders in the Networking department.

10. Make a screen capture showing the permissions for the FacultyNotes folder in the Advanced Security Settings dialog box.

Section 3: Challenge and Analysis

Part 1: Modify the Group Structure

Describe how you would modify the group structure and file system permissions to accommodate this request.

Incomplete

Make a screen capture showing the **updated Groups associated with the Faculty OU**.

Incomplete

Part 2: Audit Folder Permissions

Make a screen capture showing the **permissions for the C:\yourname\Security folder in PowerShell**.

Incomplete

Part 3: Modify Folder Permissions

Make a screen capture showing the **modified permissions for the C:\yourname\Security folder in PowerShell**.

Incomplete
