

Managing Windows Accounts and Organizational Units (3e)

Access Control and Identity Management, Third Edition - Lab 04

Student:

Christopher Phan

Email:

cphan@udallas.edu

Time on Task:

4 hours, 48 minutes

Progress:

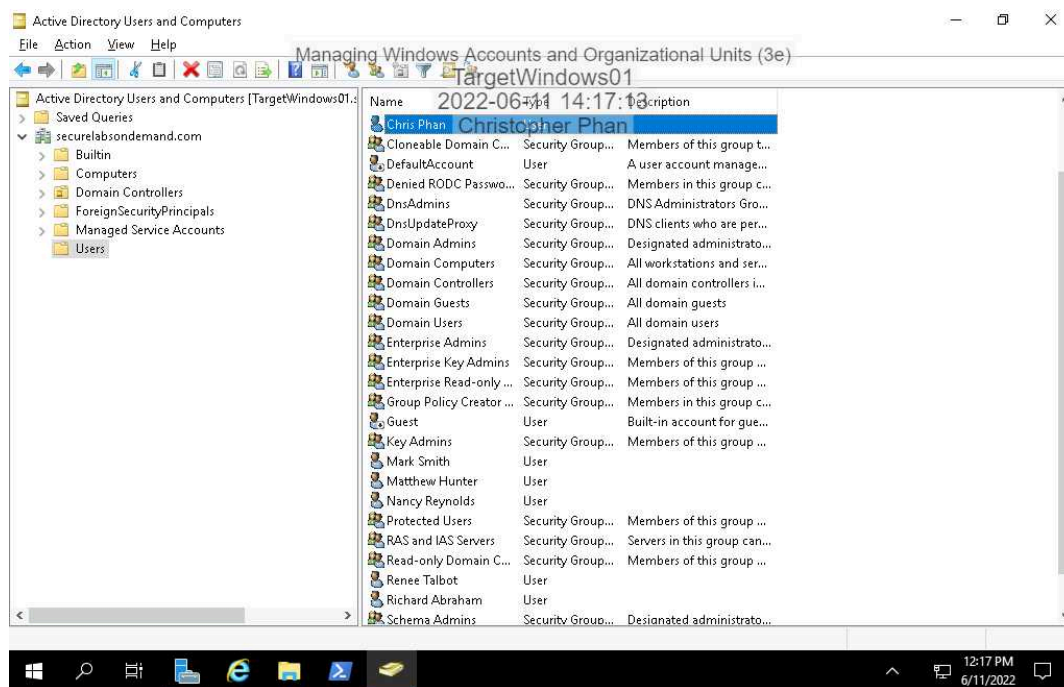

64%

Report Generated: Saturday, June 11, 2022 at 4:45 PM

Section 1: Hands-On Demonstration

Part 1: Create User Accounts

12. Make a screen capture showing the new user accounts.

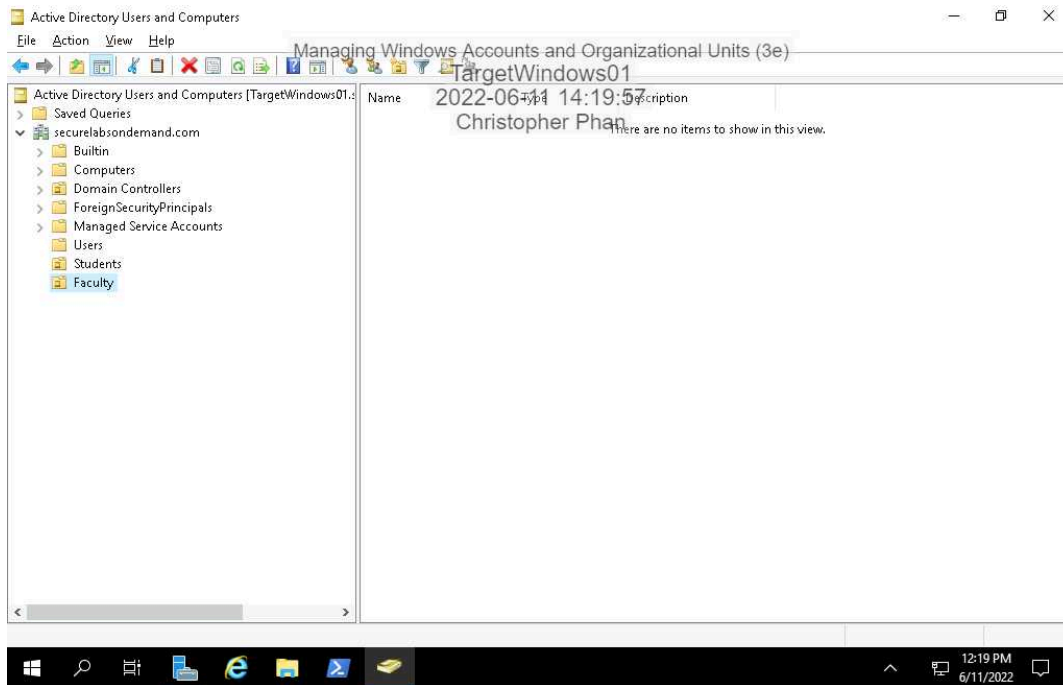

Part 2: Create Organizational Units

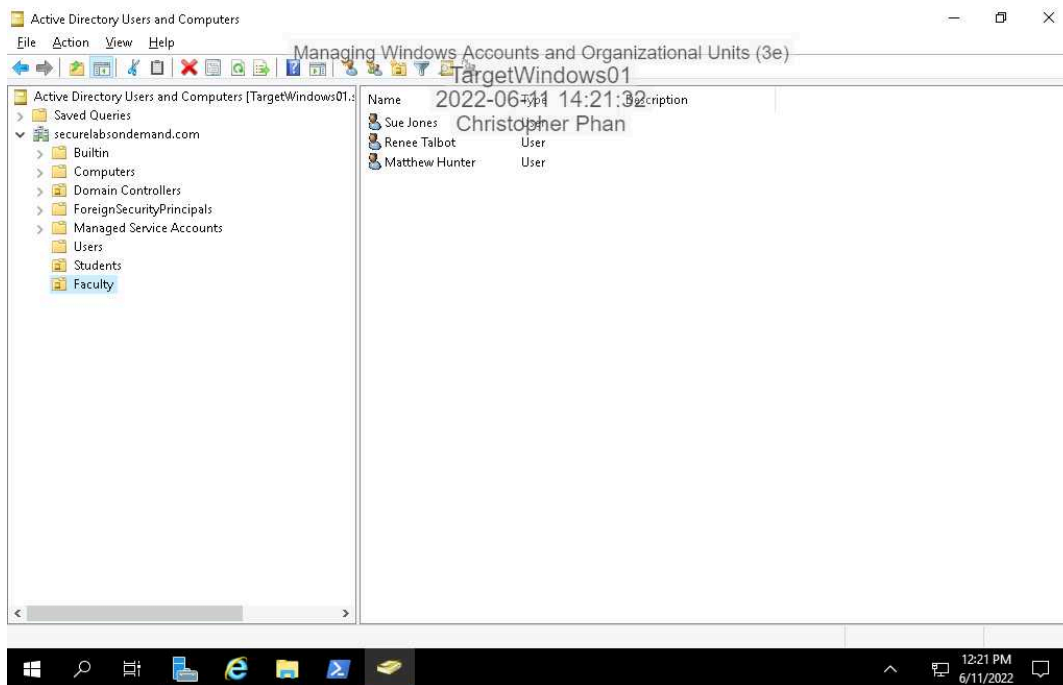

Managing Windows Accounts and Organizational Units (3e)

Access Control and Identity Management, Third Edition - Lab 04

4. Make a screen capture showing the two new OUs.

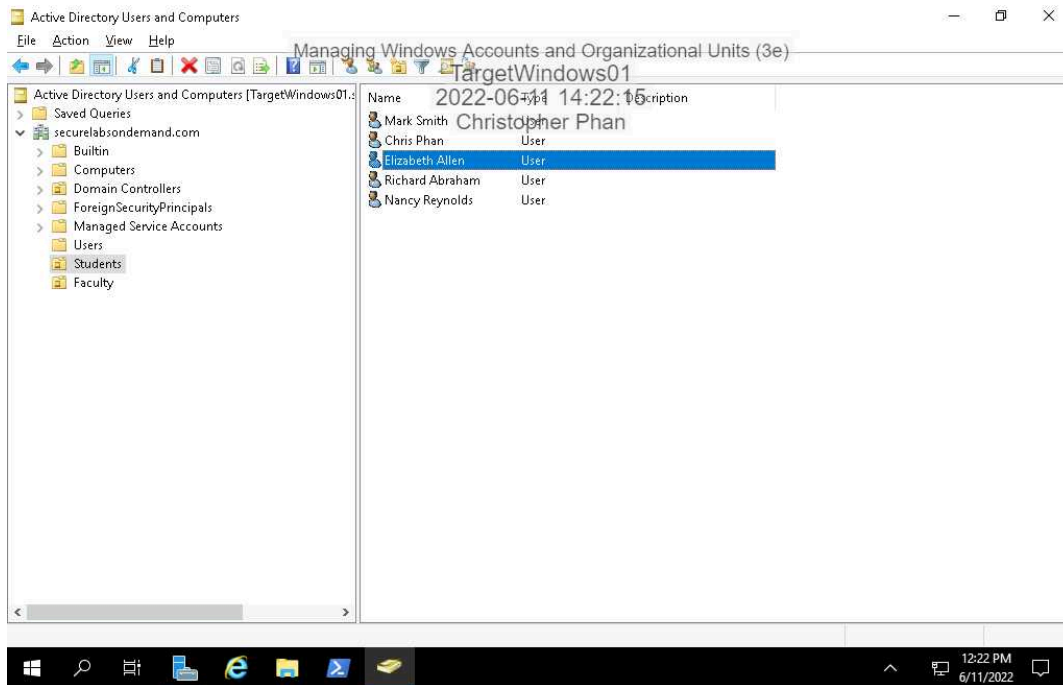

10. Make a screen capture showing the accounts in the Faculty Organizational Unit.

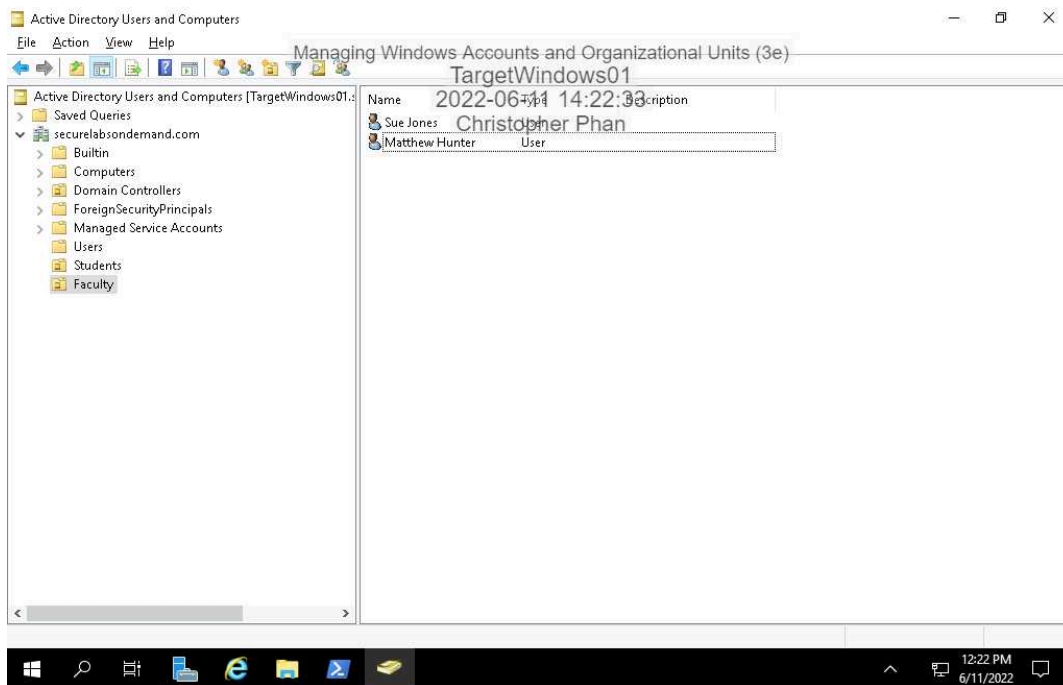

Part 3: Change Existing User Accounts

5. Make a screen capture showing the updated contents of the Students OU.

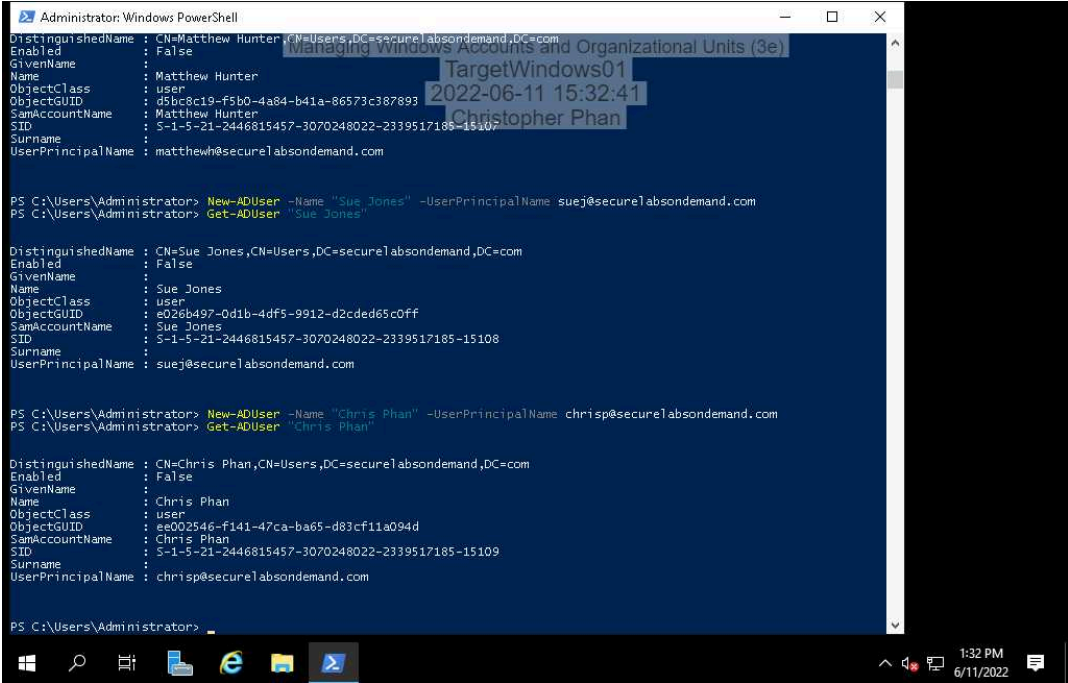

9. Make a screen capture showing the updated contents of the Faculty OU.

Section 2: Applied Learning

Part 1: Create User Accounts

6. Make a screen capture showing the user account details for your own user account.

```

PS C:\Users\Administrator>
```

The screenshot shows a Windows PowerShell window titled "Administrator: Windows PowerShell". It displays the output of several commands. First, it shows the details of the current user, Matthew Hunter, using the `Get-ADUser` command. Then, it shows the creation of a new user account, Sue Jones, using the `New-ADUser` command, followed by the retrieval of Sue Jones's details using the `Get-ADUser` command. Finally, it shows the creation of another new user account, Chris Phan, using the `New-ADUser` command, followed by the retrieval of Chris Phan's details using the `Get-ADUser` command. The window also shows a taskbar at the bottom with various icons and a system clock indicating 1:32 PM on 6/11/2022.

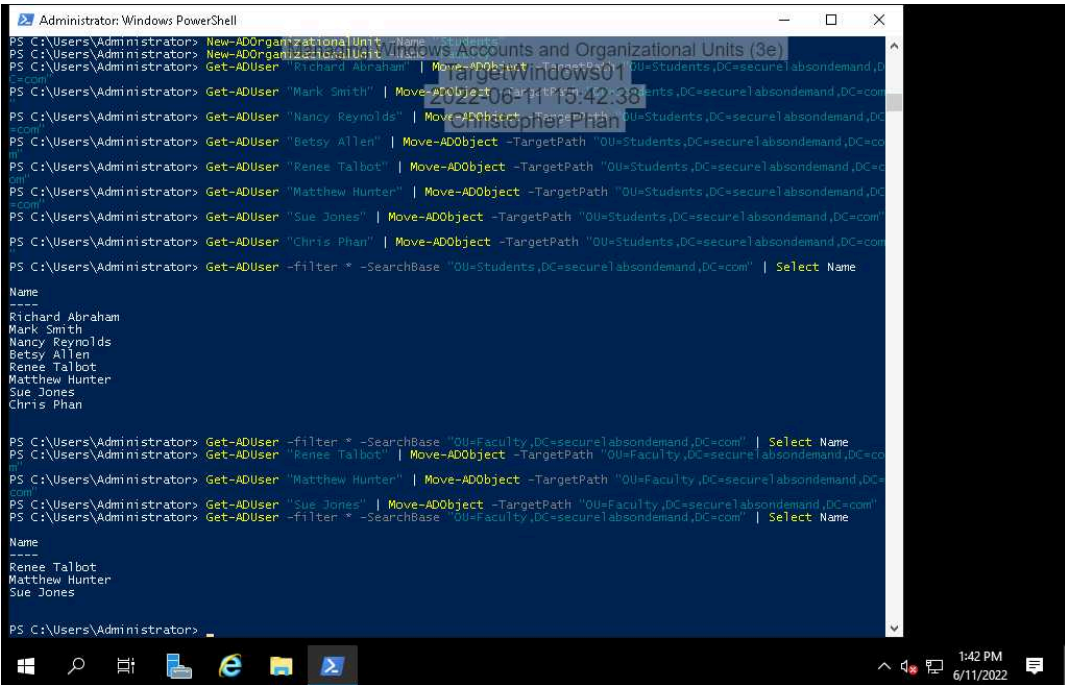

12. Make a screen capture showing the PowerShell commands that enabled all of the user accounts.

PS C:\Users\Administrator>
```

Section 3: Challenge and Analysis

Part 1: Choose an Account Management Approach

Write a brief opinion describing which method of user account maintenance you prefer. Would you use one method over the other in all cases, or would you use each for a specific purpose? Give examples.

Incomplete

Part 2: Build a User Inventory and Remove Unnecessary Accounts

Make a screen capture showing the **successfully executed account inventory command** in PowerShell.

Incomplete

Make a screen capture showing the **successfully executed account deletion command** in PowerShell.

Incomplete

Part 3: Automate the Creation of New Accounts

Make a screen capture showing the **completed account creation PowerShell script**.

Incomplete

Make a screen capture showing the **successfully executed account creation PowerShell script**.

Incomplete
